Features

Polypropylene wrapped MDF
Mortise and tenon joints
Magnets/Hinges pre-assembled
High-tech tension pin

Benefits

Durable finish
Stronger panels
Easy installation
Provides a firm closure

WOODLORE[®]

CUSTOM SHUTTERS

Attractive Frame Choices

Heading the list of our exclusive Deco Frame for outside mounts. A removable insert conceals all mounting fasteners, so there's no need to nail through and mar the decorative frame. The insert simply snaps onto the frame over the fasteners.

To complement versatile window solutions, our L-frame mounts easily around molding, directly on top of molding, or to the wall with no molding. Its narrow base also makes it an ideal choice for French doors.

Adding to the list of frame options is our Z-frame, which is an inside mount frame with a decorative face. The decorative face not only covers light gaps, but it is also ideal for windows that may be out-of-square.

(Inside mount frames and compact frame options are shown in the mounting options.)

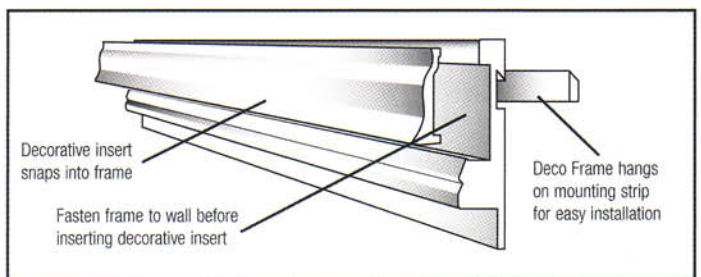

Superior Material Construction & Craftsmanship

Woodlore Custom Shutters are constructed from an extremely durable composite wood with a tough polypropylene coating covering all surfaces. This unique combination of materials and finish resists warping, shrinkage, moisture and other problems associated with solid wood shutters. Our high gloss finish resists scuffing, chipping, peeling, paints, inks, and general deterioration, and it incorporates a special UV inhibitor to prevent color fading.

Fast, Foolproof Installation

Woodlore's mounting strip is easily fastened on the wall above the window. The installer can then hang the frame onto the strip, add the panels, and make final adjustments before permanently attaching the shutter to the wall.

Louver Shapes & Sizes

Our attractive oval louvers provide a smooth, perfect closure. Widths: 1 7/8", 2 1/2", 3 1/2", 4 1/2"

Louver Tension Adjustment

In each panel, an internal adjustment bar runs through the center louver for tension adjustment should the louvers ever become loose.

Magnetic Panel Closure

Every panel is fitted with magnetic fasteners at top and bottom for perfect closure. Small but ultra strong magnets are used. An additional magnet is added to single panels taller than 60" to double the strength of closure.

Colors Offered

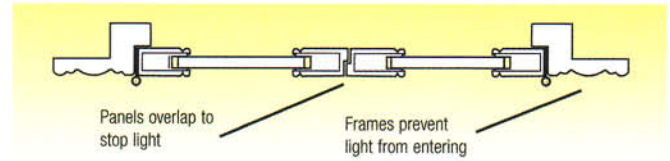

Solid: White or Alabaster

Stained: Light Pecan or Honey

Hinges: White, Alabaster Antique Brass, or Stainless Steel

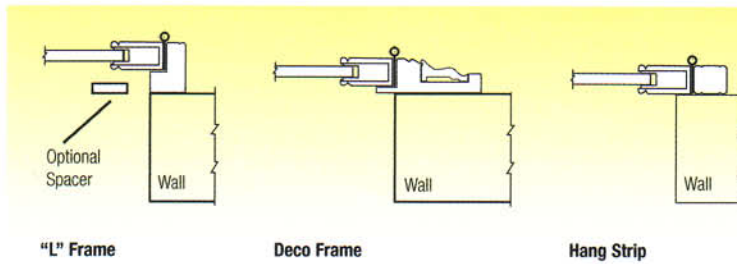

No Light Gaps

Panels overlap where they meet and where they fit into the frames, keeping light from entering the room.
